

Online Guidance and Advice Service

OLGA is our online guidance and advice service and contains a range of very useful information sheets, technical guidance notes and specimen documents. It replaces the former Reference Manual for Community organisations and Advisers.

OLGA is made up of 3 sections: information sheets which provide practical, easy to use guidance; technical guidance notes which give more detailed; and technical guidance and specimen documents that complement both. Together they provide a complete resource for managing a community organisation and its premises.

You will find four symbols on various sheets: Pre Visible, Visible, Assets and Legal. These are designed to show at a glance where the particular document has relevance.

The documents within OLGA are all individually priced. Members will need to [sign in](#) first to download the documents free of charge from the [Members Area](#).
